This is my second attempt

Attempt to what?

To write something with/in .ps
And how is it going?

Idk. Let's try!

This is my second attempt

Attempt to what?

To write something with/in .ps
And how is it going?

Idk. Let's try!

This is my 15th attempt I can see the fun in that, but right now it's still a little bit blurry

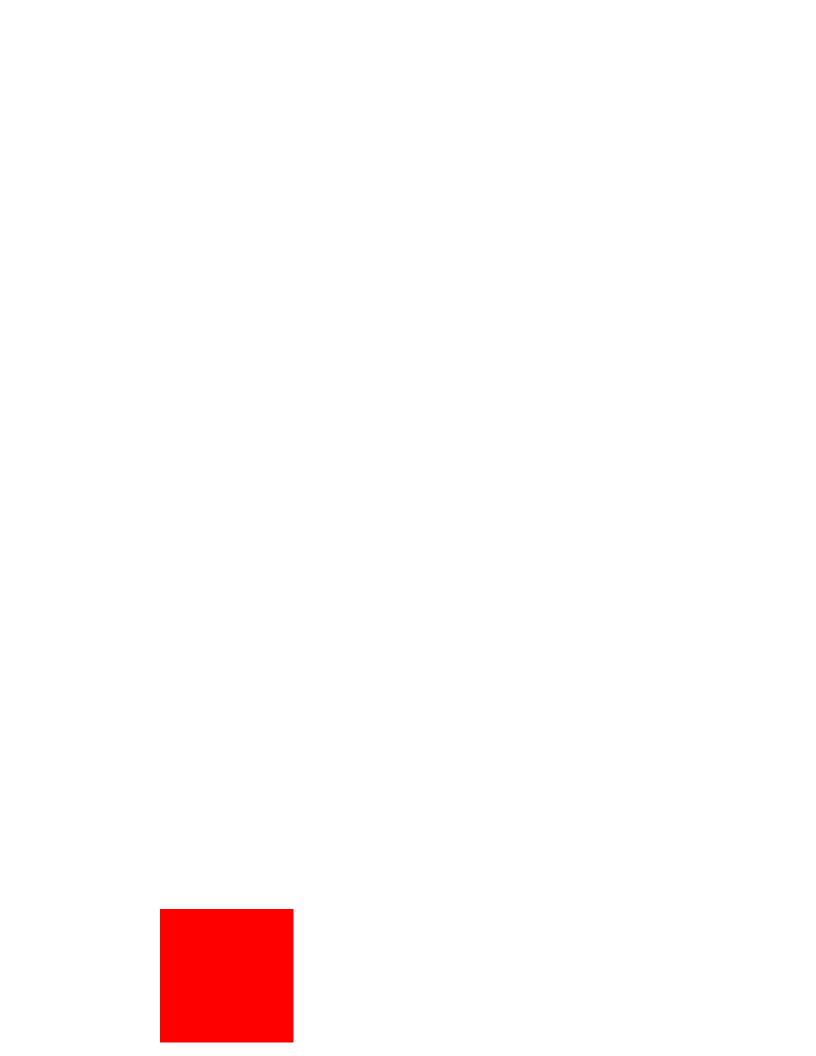

I can see the fun in that, but right now it's still a little bit blurry for me. I'm having fun, but I feel like I could do so much more with html/css (obviously duh). Yet, I want to try more things with PostScript cause it's still fun

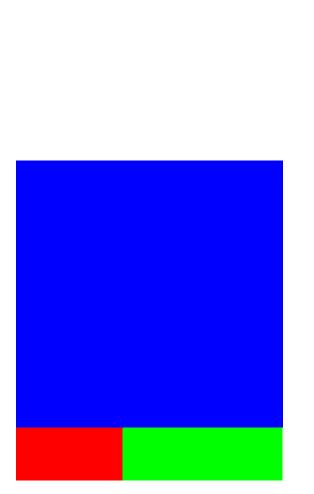

I would like to learn more about the financial implications of .ps and the Adobe softwares

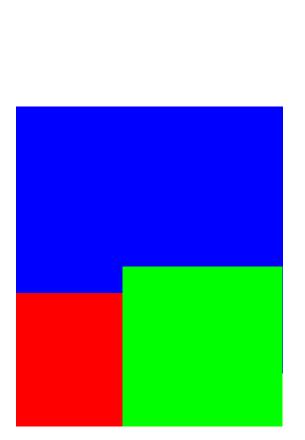

This is my 17th attempt

And I feel like I'm afraid to try more things cause the documentation is very dense and I don't understand about 3/4 of what I'm reading. So I stick to what I know, which is Graphic Design and fonts <3

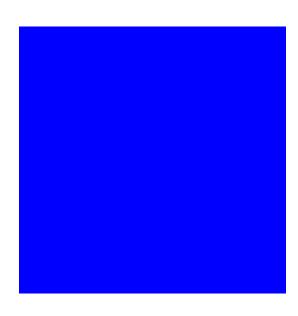

Is that even working ??

This is my second attempt

Attempt to what?

To write something with/in .ps
And how is it going?

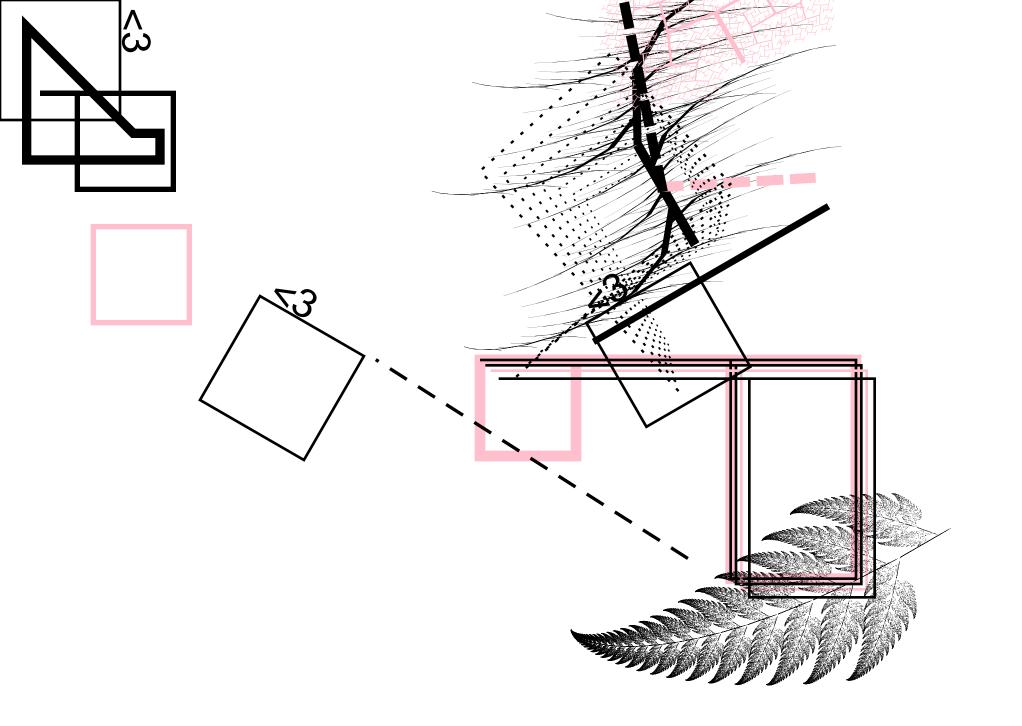

Idk. Let's try!
