

\

The \ HTML element is used to embed sound content in documents. It may contain one or more audio sources, represented using the src attribute or the element: the browser will choose the most suitable one. It can also be the destination for streamed media, using a MediaStream.

<https://developer.mozilla.org/en-US/docs/Web/HTML/Element/audio>

In [... %%html

```
<audio controls src="filename.mp3">  
  Your browser does not support the  
<code>audio</code> element.  
</audio>
```

Your browser does not support the `audio` element.
